By executing Mortgage Bond and Unsecured Bond placements as part of the Programme, the Issuer raises forint and foreign currency funds in the capital market so that it may offer its customers loans that are predictable over the long term and bear interest at competitive rates, while enabling eligible customers to maximise their benefit from public interest rate subsidies. Additionally, raising long-term funds by means of the placements executed as part of the Programme also enables the Issuer to improve its structural liquidity situation. A further business objective of individual placements within the Programme is to provide the Issuer with funds to purchase the greatest possible volume of performing receivables from the loans granted by the commercial banks that are parties to cooperation agreements with the Issuer for the purchase of independent liens.
